## To Remove the Chassis and Printed Circuit Board from the Cabinet

- (1) Open the Battery Lid and take out the Batteries.
- (2) Remove the two Back Cover Securing Screws.  
It is not necessary to remove the Telescopic Antenna Holding Screw located at the lower right-hand corner of the Back Cover.
- (3) Open the Back Cover gently and detach the white antenna lead at the Telescopic Antenna by pulling out the Pin Plug from the Pin Connector Jack.
- (4) Remove the three Screws (F 2.6 × 5), the two Nuts (2.6φ) and the Back Cover Securing Screw Post shown by red arrows in the figure below.
- (5) If necessary, unsolder the following wires and remove the Twin Earphone Jack and the DET OUT Jack by pulling straight up.
  - a) Two wires (a black and a yellow) at the Speaker Terminals.
  - b) One red wire at the Battery Positive Contact Plate.
  - c) One black wire at the Battery Negative Spring.
  - d) Two wires (a red and a black) at the Tuning Meter.
